

Fruth.com

SEO Progress Report

Reporting Period: April 27, 2026 – May 27, 2026
Prepared by Start Advertising

Executive Summary

Over the past 30 days, targeted on-page SEO improvements have produced significant, measurable results for Fruth.com. Eight keywords that were previously not appearing in Google search results (ranked beyond position 100) are now ranking on page one or two. These improvements — driven by optimized meta titles, meta descriptions, image alt tags, and schema markup — confirm that search engines are now properly reading and indexing Fruth’s product pages.

The site’s overall On-Page SEO Score is 76/100 (rated “Great” by Ubersuggest), and 9 out of 12 tracked keywords moved up in ranking during this period. This is a strong foundation to build on.

Dashboard Snapshot — May 27, 2026

76 / 100 On-Page SEO Score	9 Keywords Moved Up	3 Keywords Moved Down	2,837 Total Backlinks
--------------------------------------	-------------------------------	---------------------------------	---------------------------------

* Organic traffic data is unavailable until Google Analytics is connected to Ubersuggest.

Keyword Ranking Wins — April 27 to May 27, 2026

The table below shows all 12 tracked keywords and their current positions. Green rows mark keywords that jumped from “not ranked” (position 100+) to page one or two of Google in just 30 days — a dramatic improvement.

Keyword	Position	Change	Vol/Mo	Difficulty
bottom seal bags	3	+97	30	11
plastic plant bags	5	+95	170	27
autoclaving bags	7	+93	880	14
plastic bags for plants	7	+93	170	33
autoclave bags	10	+90	880	16
plastic grow bag	16	+84	210	31
polypropylene grow bag	25	+75	480	21
autoclavable bags	26	+74	880	16

header bags	32	+68	140	19
fruth custom packaging	1	Steady	210	30
polyethylene film manufacturer	26	-7	170	20
polyethylene film manufacturers	28	-8	170	27

Vol/Mo = avg. monthly searches (US) | Difficulty = Ubersuggest SEO Difficulty (0–100; lower = easier to rank)

Note: The two “polyethylene film” keywords slipped slightly (7–8 positions). These keywords showed minor fluctuations and will be strengthened with additional supporting content.

Work Completed This Period

The following on-page SEO updates were implemented across Fruth.com product and category pages:

- Meta Titles (Title Tags) — Rewritten to include primary keywords naturally, within 60-character limits, to improve click-through rates from search results.
- Meta Descriptions — Crafted compelling, keyword-rich descriptions for key product pages to encourage higher organic click-through rates.
- Image Alt Tags — Added descriptive alt text to product images, improving both accessibility compliance and image search visibility.
- Schema Markup — Structured data added to product pages, helping Google understand page content and enabling eligibility for rich results.
- Keyword Research — Identified high-opportunity, lower-competition keywords relevant to Fruth’s product categories and geographic market.

Growth Opportunities — High-Opportunity Keywords for Expansion

These keywords are currently being tracked as future growth opportunities. They represent the strongest next targets, selected for meaningful search volume and achievable difficulty scores. Targeting them will expand Fruth's organic reach significantly.

Keyword	Monthly Vol	Difficulty
vacuum seal bags	49,500	42
zipper bags	5,400	38
anti static bags	4,400	30
anti static packaging	4,400	29
gusseted bags	1,900	25
gusset of bag	1,900	26
custom plastic bags	1,900	42
poly bag manufacturer	1,900	18
custom packaging solutions	1,300	42
volatile corrosion inhibitor bags	880	31
vci bags	880	31
tamper evident bags	590	16
wicketed bags	390	14
packaging films	390	42
static shielding bags	390	33
custom packaging manufacturer	260	67
lay flat bags	110	21

Priority picks for next 30 days: “tamper evident bags” (vol 590, difficulty 16), “wicketed bags” (vol 390, difficulty 14), and “poly bag manufacturer” (vol 1,900, difficulty 18) offer the best effort-to-reward ratio.

Recommendations — Next 30–90 Days

Quick Wins (This Week)

- **Connect Google Analytics to Ubersuggest to unlock real traffic data, user behavior, and conversion tracking.**
- Create or optimize a dedicated page for “tamper evident bags” and “wicketed bags” — low difficulty, solid volume, clear product fit.
- Add FAQ schema to top-ranking product pages (autoclave bags, plastic grow bags) to compete for featured snippets.

Medium Term (2–4 Weeks)

- **Refresh the “polyethylene film” page content to reverse the slight ranking drop — add 200–300 words of product-specific copy with keyword variations.**

- Build a dedicated “VCI & Corrosion Protection” category page targeting “vci bags,” “vci packaging,” and “volatile corrosion inhibitor bags” (combined ~2,000/mo searches).
- Target “poly bag manufacturer” and “gusseted bags” with focused product/landing pages optimized around those exact phrases.

Strategic (1–3 Months)

- Activate or optimize a Google Business Profile to capture local packaging searches and reinforce E-E-A-T trust signals.
- Begin link-building outreach targeting packaging industry directories and B2B trade publications to push competitive keywords above position 10.
- Develop application-focused content (e.g., “How Autoclave Bag Material Affects Sterilization Results”) to build topical authority and capture informational queries.
- Establish a monthly Ubersuggest reporting cadence: pull rank tracking + dashboard on the same date each month for clean, comparable trend data.
