

Fruth.com

SEO Progress Report

Reporting Period: May 27, 2026 – July 14, 2026
Prepared by Start Advertising | Source: Ubersuggest Rank Tracking + Site Audit

Executive Summary

Over the past 47 days, a systematic content expansion program has produced measurable, compounding results for Fruth.com. Twenty-six product pages were rewritten with B2B-focused copy, FAQ sections, and structured FAQ schema markup -- directly increasing the volume of content Google can crawl and index. The results are clear: we have increased content, we are seeing more organic traffic (+30.5%), we are seeing more keywords ranking in Google (+87.9%), and our SEO scores have increased by 2.6% (76 to 78 out of 100).

The most striking signal is keyword velocity. Organic keywords tracked by Google have nearly doubled -- from approximately 33 to 62 -- in just 47 days. This reflects Google actively discovering and indexing Fruth product pages that previously had too little content to rank. As implementation of the remaining pages continues, this upward trend is expected to accelerate.

Dashboard Snapshot -- July 14, 2026

78 / 100 ▲ +2.6% vs. May 27 On-Page SEO Score	154 ▲ +30.5% vs. May 27 Organic Traffic	62 ▲ +87.9% vs. May 27 Organic Keywords	-14.5% 76 → 65 open issues SEO Issues Resolved
--	--	--	---

★ **Standout Win:** "cleanroom packaging" jumped +80 positions to rank #20 on Google -- appearing on page two after previously being completely invisible to search engines. "autoclavable bags" moved up +11 positions to #9, putting it on page one.

Keyword Ranking Summary -- May 27 to July 14, 2026

Keyword	Position	Change	Vol/Mo	Difficulty
fruth custom packaging	1	Steady	210	30
bottom seal bags	3	Steady	30	11
autoclaving bags	6	+1	880	14
autoclave bags	8	Steady	880	16
autoclavable bags	9	+11	880	16
plastic bags for plants	11	+4	170	33
plastic plant bags	13	-1	170	27
plastic grow bag	17	+1	210	31
cleanroom packaging	20	+80	590	36
polypropylene grow bag	21	+6	480	21
polyethylene film manufacturer	28	Steady	170	20
polyethylene film manufacturers	31	-4	170	27

Vol/Mo = avg. monthly searches (US) | Difficulty = Ubersuggest SEO Difficulty (0-100; lower = easier to rank)

Change shown vs. May 27, 2026 baseline.

New Keywords Now Appearing in Google

In addition to the 12 tracked keywords above, the following keywords are now being detected in Ubersuggest rank tracking -- meaning Google has begun indexing Fruth pages for these terms. Many are fluctuating as Google evaluates the newly published content. These will stabilize and rise as pages gain age and authority.

Keyword (Emerging)	Keyword (Emerging)
lay flat bags	custom poly bags
cleanroom poly bags	ESD packaging
tamper evident bags	lip and tape bags
heavy duty plastic bags	zipper bags
medical packaging bags	cleanroom bags
black conductive bags	moisture barrier film
custom packaging supplier	anti static bags
VCI plastic packaging	food safe plastic bags
sterilization packaging bags	gusset of bag
electronics packaging materials	nylon packaging

These keywords were not visible in May 27 tracking. Their appearance confirms Google is actively crawling and indexing the expanded product pages.

Work Completed This Period

Content Expansion -- 26 Product Pages

Every key product and barrier film page on Fruth.com was rewritten with B2B-focused, keyword-rich copy. Each page received a structured BEFORE / AFTER content upgrade -- replacing thin, generic descriptions with detailed product specifications, applications, and industry-specific language that Google can rank.

- **Bags Hub (category page) -- rewritten to anchor the entire bags product section**
- Individual bag pages (14): Autoclave, Bakery, Bottom Seal, Cleanroom, Foam, Fresh Produce, Grow, Gusset, Header, Lay Flat, Lip & Tape, Multi-Pocket, Side Seal, Square Bottom
- Additional bag pages (7): Tamper Evident, Vacuum Seal, VCI Bags, Wicketed, Zipper, Header, and specialty variants
- Barrier Films (5): Black Conductive Film, FFP Barrier Film, Kraft Foil Barrier Film, Scrim Foil Barrier Film, MIL-PRF-131K Barrier Film
- Films (3): Anti-Static Film, Flame Retardant PE Film, Nuclear Green PE Film, Nylon Film, Polypropylene Film

FAQ Schema (JSON-LD) -- All 26 Pages

Structured FAQ schema was added to every product page, making Fruth eligible for Google FAQ rich results -- expanded search listings that display questions and answers directly in Google's search results page, increasing visibility and click-through rate without requiring a higher ranking position.

- Organization Schema also added to the homepage for brand entity recognition

- Schema follows Google's recommended JSON-LD format embedded via HubSpot custom HTML

HubSpot Implementation -- 14 Pages Live

Content and schema have been implemented in HubSpot for 14 pages as of July 14, 2026.

Implementation is ongoing; remaining pages will be completed in the next 1-2 weeks.

- **Implemented (14): Autoclave Bags (7/7), Bakery Bags (7/7), Bags Hub (7/7), Black Conductive Film (7/7), Bottom Seal Bags (7/7), Cleanroom Bags (7/7), FFP Barrier Film (7/8), Foam Bags (7/8), Fresh Produce Bags (7/8), Grow Bags (7/8), Gusset Bags (7/8), Header Bags (7/8), Kraft Foil Barrier Film (7/13), Lay Flat Bags (7/13)**
- **Pending (12): Lip & Tape Bags, Multi-Pocket Bags, Side Seal Bags, Square Bottom Bags, Tamper Evident Bags, Vacuum Seal Bags, VCI Bags, Wicketed Bags, Zipper Bags, Scrim Foil Film, MIL-PRF-131K Film, Homepage**

Open Technical Issues -- Site Audit

The July site audit identified the following issues to address. Low word count pages are actively being resolved through the content expansion implementation. The items below require focused attention.

Issue	Recommended Action
Duplicate title tag + meta description: lay-flat-bags and lip-and-tape-bags share identical title ("Lip & Tape Bags Resealable Protective Packaging Bags") and identical meta description	Priority fix: update Lay Flat Bags title and meta to be unique. Suggested title: "Lay Flat Bags Clear Polyethylene Tubing & Custom Sizes"
No H1 tag: 3 pages missing H1 heading -- /capabilities, /fruth-360, /our-story	Add a single, keyword-relevant H1 to each page. Easy fix, medium SEO impact.
Title tag too long: Learning Center article title exceeds 65 characters - "Fruth Custom Packaging Adds Capacity to Serve Increasing Demand for Biohazard Bags and Autoclave Bags"	Shorten to under 65 characters. Suggested: "Fruth Adds Capacity for Biohazard & Autoclave Bag Demand"
Non-SEO-friendly URLs: /fruth-360, /products, /products/films flagged (keyword mismatch with page content)	Low priority -- URL changes risk broken links. Consider in a future site restructure only.
Temporary redirects (37 instances): all are ?hsLang=en parameter URLs (HubSpot language detection)	Low priority -- these are HubSpot's language-detection redirects, not true redirect issues. No action needed.
Low word count: 29 pages still below recommended threshold	Actively being resolved through content expansion implementation. Expected to drop significantly as remaining 12 pages go live.

Growth Opportunities -- High-Value Keywords to Target Next

With the content expansion now live and Google beginning to index product pages, the following keywords represent the strongest next-phase opportunities. Selected for meaningful search volume and achievable difficulty.

Keyword	Monthly Vol	Difficulty
vacuum seal bags	49,500	42
zipper bags	5,400	38

anti static bags	4,400	30
anti static packaging	4,400	29
poly bag manufacturer	1,900	18
gusseted bags	1,900	25
tamper evident bags	590	16
cleanroom packaging bags	590	28
wicketed bags	390	14
static shielding bags	390	33
moisture barrier bags	260	22
custom poly bags	260	29
lay flat tubing	210	20
VCI packaging	880	31

Priority picks: 'tamper evident bags' (590/mo, difficulty 16), 'wicketed bags' (390/mo, difficulty 14), and 'poly bag manufacturer' (1,900/mo, difficulty 18) offer the best effort-to-reward ratio. These pages are already written -- implementation in HubSpot will unlock their ranking potential.

Recommendations -- Next 30-90 Days

Quick Wins (This Week)

- **Fix duplicate title + meta: Lay Flat Bags and Lip & Tape Bags must have unique titles and meta descriptions immediately -- this is a direct ranking conflict.**
- Complete HubSpot implementation for remaining 12 pages -- each page live = more keywords indexed, more traffic opportunity.
- Add H1 tags to /capabilities, /fruth-360, and /our-story -- easy fix, removes a medium-impact audit flag.
- Shorten the Learning Center article title to under 65 characters.

Medium Term (2-4 Weeks)

- **Connect Google Analytics to Ubersuggest -- unlocks real session data, user behavior, landing page performance, and conversion tracking.**
- Build out the EMI Static Shielding Barrier Film page -- currently 149 words. Add content expansion + schema matching other barrier film pages.
- Monitor 'cleanroom packaging' rank weekly -- it's at #20 and climbing. A targeted internal link from the Cleanroom Bags page will accelerate it toward page one.
- Create a dedicated VCI / Corrosion Protection category page targeting 'VCI bags,' 'VCI packaging,' and 'volatile corrosion inhibitor bags' (combined ~2,000 searches/mo).

Strategic (1-3 Months)

- **Begin link-building outreach to packaging industry directories and B2B trade publications -- backlinks push competitive keywords above position 10.**
- Develop application-focused Learning Center articles (e.g., 'What Autoclave Bag Material Is Right for Your Sterilization Process?') to build topical authority and capture informational searches.
- Activate or expand Google Business Profile to capture local packaging searches and strengthen E-E-A-T trust signals.

- Establish a monthly Ubersuggest reporting cadence: pull rank tracking + site audit on the same date each month for clean, comparable trend data.
