SEO HEALTH SCORE
Needs Improvement

Garlock

https://gcpflexpack-24024882.hs-sites.com

REPORT DATE

**August 17,
2026**

PAGES AUDITED

120

CRITICAL
ISSUES

7

IMPROVEMENT
OPPORTUNITIES

**70 of 120
pages**

FULLY
OPTIMIZED

**48 of 120
pages**

SCORE HISTORY

Score note: The SEO Health Score deducts heavily for critical issues (missing titles, H1s, meta descriptions, image alt text) and applies a smaller deduction for pages with improvement opportunities such as schema markup, canonical tags, and content depth.

0

Pages Missing Title

0

Missing Meta Description

1

Pages Missing H1

21

Pages Without Schema

6

Pages w/ Missing Image Alt

4

Missing Canonical Tag

48

Fully Healthy Pages

120

Total Pages Audited

QUICK WINS & RECOMMENDATIONS

Low effort

High impact

Optimize title tag length on 35 pages

3 titles are under 30 characters (missing keyword opportunities). 32 titles exceed 65 characters and will be cut off in search results.

Low effort

Medium impact

Fill in empty image alt text on 12 pages

Alt text is already in the code but blank. Adding keyword-relevant descriptions takes minutes and improves both accessibility and image search rankings.

Low effort

Medium impact

Rewrite meta descriptions on 12 pages

7 meta descriptions are too short to persuade clicks. 5 are too long and get truncated in search results.

Low effort

Medium impact

Fix multiple H1 tags on 6 pages

Each page should have exactly one H1. Multiple H1s dilute the main topic signal Google uses to understand the page.

Low effort

Medium impact

Add canonical tags to 4 pages

Canonical tags are a single line of code. They tell Google which version of a page to index and prevent duplicate content penalties.

AUDIT SUMMARY

Overall SEO Health Score	83 / 100 — Needs Improvement
Pages missing an H1 heading	1 page affected
Pages without structured data (schema)	21 pages affected
Pages with images missing alt text	6 pages affected
Pages with improvement opportunities (schema, word count, canonical)	70 of 120 pages
Fully optimized pages (no issues, no warnings)	48 of 120 pages

What this means: A score of 83/100 means your site has no critical SEO problems. Pages listed under "improvement opportunities" have advisory items — adding schema markup, increasing content length, or setting canonical tags — that can help rankings but are not broken elements.

FINDINGS BY PAGE (72 PAGES NEED ATTENTION)

/products/printed-rollstock/peel-reseal-rollstock

HIGH Images missing alt text (1)

Alt text helps Google understand images and is required for accessibility compliance.

MEDIUM Title too long (69 chars, aim for 50-65)

Long titles get cut off in search results. Aim for 50-65 characters.

LOW 1 image(s) have empty alt text

LOW No JSON-LD schema found

/capabilities/finishing-slitting-flexible-packaging

HIGH Images missing alt text (1)

Alt text helps Google understand images and is required for accessibility compliance.

LOW No JSON-LD schema found

/products/printed-rollstock/paper-flexible-packaging

HIGH Images missing alt text (1)

Alt text helps Google understand images and is required for accessibility compliance.

LOW No JSON-LD schema found

/markets/pet-foods

HIGH Images missing alt text (2)

Alt text helps Google understand images and is required for accessibility compliance.

LOW No JSON-LD schema found

/request-a-consultation

CRITICAL Page has no main heading (H1)

The H1 tells search engines what the page is about. Every page should have exactly one.

LOW No JSON-LD schema found

/learning-center/how-an-artisan-meats-company-improved-their-productivity-and-branding-with-die-cut-rollstock

HIGH Images missing alt text (1)

Alt text helps Google understand images and is required for accessibility compliance.

/learning-center/the-benefits-of-reclose-technology

HIGH Images missing alt text (1)

Alt text helps Google understand images and is required for accessibility compliance.

/news

LOW Meta description short (37 chars)

Short meta descriptions waste valuable space to attract clicks from search results.
