

SEO AUDIT REPORT

Start Again Associates

startagainassociates.com

Prepared by: Parts of Practice

Audit Date: May 26, 2026

CONFIDENTIAL

1. Overall SEO Health Score: 31 / 100

**SCORE: 31 / 100 | Ubersuggest On-Page: 67/100 |
Organic Traffic: 1/month | Ranking Keywords: 2**

Start Again Associates has an exceptional clinical team, a proprietary protocol, and 30 years of track record - but is essentially invisible online. With only 1 organic visitor per month and 2 ranking keywords across 31 crawled pages, the site is failing to connect its expertise with the clinicians and treatment centers who need it. The foundation is technically sound (SSL valid, sitemap present, desktop speed excellent), but the content, metadata, and mobile experience need a near-complete rebuild.

Note: Ubersuggest scores 67/100 for technical on-page checks only. The 31/100 score above reflects real-world visibility, content depth, mobile performance, conversion readiness, and E-E-A-T signals.

2. Top 5 Priorities

#	Priority	Impact	Effort
1	Build out the homepage - currently blank with zero SEO value	Critical	Medium
2	Write unique title tags and meta descriptions for all 31 pages	High	Low
3	Fix mobile load time (7.62s - rated POOR)	High	Medium
4	Unblock 3 pages from search engine indexing	High	Low
5	Set up Google Business Profile and Search Console	High	Low

3. Quick Wins (Under 2 Weeks)

- **Unblock 3 pages** currently blocked from search engines - check Squarespace page settings and confirm they should be indexed.
- **Fix 1 page with no title tag** - identify the page in Search Console and add a keyword-rich title immediately.
- **Resolve 4 duplicate title tags** - each page must have a unique title targeting a specific keyword.
- **Resolve 3 duplicate meta descriptions** - write unique descriptions for all affected pages.
- **Fix 3 broken links (4XX errors)** - find and remove or redirect all dead links.
- **Set up Google Search Console** - submit sitemap, confirm indexing, identify crawl errors.

4. Medium-Term Recommendations (2-8 Weeks)

- **Write the homepage.** Add a hero section, value proposition, service overview, trust bar, testimonials, and a strong CTA. This is the most impactful single change on the site.
- **Add meta descriptions to 18 pages.** Currently missing across the majority of the site - direct impact on rankings and click-through rate.
- **Fix 8 title tags that are too short.** Expand to 50-60 characters with target keywords. Also fix 2 titles that are too long - trim to under 60 characters.
- **Fix 4 poorly formatted URLs.** Ensure all URLs use hyphens, lowercase, and descriptive keywords.
- **Expand thin content on 12 pages.** Each page should hit a minimum of 300 words; key service pages should target 700-1,000 words.
- **Add Organization and Person schema** for Dr. Stephen Dansiger and Roshni Chabra/
- **Add Course schema** to the EMDR Training page to enable rich results in Google.
- **Address mobile load time.** Audit image sizes, lazy loading, and Squarespace template settings. Target under 3 seconds.

5. Long-Term / Strategic Recommendations

- **Create dedicated landing pages for EMDR Training Part I and Part II.** Each deserves its own URL, title tag, meta description, and optimized content.
- **Build a MET(T)A Protocol page.** This proprietary branded term has zero competition - SAA should completely own the search results for it.
- **Build a For Treatment Centers page.** The B2B training audience needs its own entry point with agency-specific messaging.
- **Connect Google Analytics.** No data visibility currently - essential for tracking ROI and informing future decisions.

6. Technical SEO Analysis

Element	Status	Notes
Title Tags	Critical Issues	1 missing, 4 duplicate, 8 too short, 2 too long
Meta Descriptions	Critical	18 pages missing, 3 duplicate - Google writing its own
H1 Tags	Passing	All pages have an H1 - one of the few positives
Schema / Structured Data	None	No Organization, Person, Course, or LocalBusiness schema
XML Sitemap	Present	Sitemap.xml present and valid
SSL Certificate	Valid	HTTPS is clean - no issues
Desktop Page Speed	1.37s - Great	Well under the 2.5s threshold
Mobile Page Speed	7.62s - POOR	3x above threshold - major ranking suppression on mobile
Mobile Interactivity	989ms - POOR	Should be under 200ms - poor user experience

Element	Status	Notes
Visual Stability (CLS)	0.00 - Great	No layout shift on desktop or mobile
Broken Links	3 Broken	3 pages return 4XX errors - fix or redirect
Blocked Pages	3 Blocked	3 pages blocked from indexing - verify intent
URL Structure	Issues	4 pages with poorly formatted URLs
Image Alt Text	Not Assessed	Manual review needed - likely missing on many images
Content Compression	Passing	Enabled across site

7. On-Page SEO and Content Analysis

Homepage

Status: BLANK - no visible content, no value proposition, no CTA.

This is the most critical single issue on the site. The homepage has no content for Google to index and no message for visitors who land on it. In a YMYL (Your Money, Your Life) niche like mental health training, a blank homepage receives zero trust signals from Google quality raters. The result: Google does not know what the site is about, ranks it for nothing, and first-time visitors immediately bounce.

About Page

Status: Good foundation - but key content belongs on the homepage.

Strong E-E-A-T content exists here: 30-year history, team credentials, mission statement, and the MET(T)A Protocol. Key facts from this page should be surfaced on the homepage where more visitors will see them.

EMDR Training Page

Status: Best-developed page on the site.

Comprehensive content covering curriculum, consultation requirements, eligibility, and fees. However, it is doing all the heavy lifting. Splitting Part I and Part II into separate pages would allow each to rank independently for their own keywords.

Staff Page

Status: Strong E-E-A-T signals - needs schema markup.

Detailed bios for Dr. Dansiger and Roshni Chabra are valuable trust signals. Add schema markup. Also add license numbers (PsyD, LMFT, MFT), EMDR-IA approval status, and links to external profiles and publications.

Resources Page

Status: Thin - past webinar thumbnails only.

This should evolve into a full content hub with articles, guides, and downloadable resources targeting search queries from clinicians seeking EMDR education.

Content Quality Summary

Metric	Assessment
Word count	Low - 12 of 31 pages flagged as thin content by Ubersuggest
Keyword targeting	Absent - no intentional keyword strategy detectable across any page
Internal linking	Weak - navigation-only, no contextual links between pages
CTAs	Weak - no clear Register, Book, or Get Started buttons on most pages

8. E-E-A-T Analysis

Signals Present

- Staff bios with credentials (Staff page)
- Founder story with 30-year history (About page)
- Proprietary protocol with named creator (MET(T)A Protocol - Dr. Dansiger)
- EMDR-IA Approved program status mentioned (EMDR Training page)

- Dr. Dansiger is a published author of multiple clinical books

Critical E-E-A-T Gaps

- **No testimonials anywhere on the site.** For a training provider, trainee quotes with name, credential, and location are powerful trust signals. Add to homepage and EMDR Training page.
- **License numbers not prominently displayed.** Add PsyD, LMFT, MFT, and EMDR-IA Approved status to all bios and the site footer.
- **No media or press page.** Dr. Dansiger has books, podcasts, and speaking engagements - these belong on the site as authority signals.
- **No external validation links.** Link to EMDR International Association approval, book listings, podcast appearances, and professional associations.

9. Conversion and User Experience Issues

- Homepage CTA: None - page is blank. Users who land on the homepage have no path forward.
- Navigation: No direct Register or Book a Training CTA in the nav bar - add a sticky button.
- Mobile load time (7.62s) will cause significant bounce rates from mobile search traffic.
- Trust above the fold: None on homepage. Strong on About and Staff pages but these are secondary entry points.
- Social proof: Absent sitewide - no reviews, no trainee count, no recognizable logos or affiliations.

Recommended UX Fixes

1. **Add a sticky Register for EMDR Training button** to the navigation bar - visible on every page.
2. **Add a trust bar above the fold on the homepage:** EMDR-IA Approved | 30 Years of Practice | Psychologists, MFTs and LCSWs Welcome | In-Person and Online.
3. **Add testimonials** to the homepage and EMDR Training page - 3 quotes minimum with name, credential, and city.
4. **Add a clear phone number and email** to the header or footer on every page.

10. Content and Keyword Strategy

Primary Audience: Licensed clinicians (MFTs, LCSWs, Psychologists) seeking EMDR certification.

Secondary Audience: Treatment centers and group practices seeking agency-level training.

Tertiary Audience: Individuals seeking trauma-focused therapy services.

Keyword	Intent	Est. Difficulty	Priority Page
EMDR training for therapists	Commercial	Medium	/emdr-training
EMDR certification program	Commercial	Medium	/emdr-training
EMDR therapy training online	Commercial	Medium	/emdr-training
EMDR Part 1 training	Commercial	Low	/emdr-training-part-1 (new)
EMDR Part 2 training	Commercial	Low	/emdr-training-part-2 (new)
MET(T)A Protocol training	Branded	Very Low	/metia-protocol (new)
trauma-focused therapy training	Commercial	Medium	/emdr-training
EMDR training for addiction clinicians	Commercial	Low	/emdr-training

Top Content Gap Opportunities

5. **No MET(T)A Protocol page.** This proprietary method is a major branded keyword opportunity - SAA should own the search results for it completely.
6. **No dedicated consultation page.** Consultation is buried in the EMDR Training page - it deserves its own URL and keyword targeting.
7. **No For Agencies or For Treatment Centers page.** The B2B training audience has no dedicated entry point.
8. **No blog or articles.** Clinicians searching for EMDR education land on competitors with rich content libraries.

11. Action Plan

Week 1 - Quick Wins

9. **Unblock 3 pages** blocked from search engines (Roshni to check Squarespace page settings)
10. **Set up Google Search Console** and submit sitemap
11. **Claim and complete Google Business Profile**
12. **Fix the 1 page with no title tag**
13. **Resolve 4 duplicate title tags** and 3 duplicate meta descriptions

Weeks 2-3 - Homepage and Metadata

14. **Write and publish homepage content** (use copy framework in Appendix)
15. **Write unique meta descriptions** for all 18 pages currently missing them
16. **Expand and optimize title tags** on 8 short and 2 long pages
17. **Fix 4 poorly formatted URLs** with 301 redirects from old URLs

Weeks 4-6 - Content and Schema

18. **Expand thin content** on 12 flagged pages to 300-500 words each
19. **Add Organization and Person schema** to homepage, About, and Staff pages
20. **Add Course schema** to EMDR Training page
21. **Investigate and fix mobile load time** (image audit, Squarespace template review)

Weeks 6-8 - Strategic Pages

22. **Create EMDR Training Part I and Part II pages** (separate URLs, separate optimization)
23. **Create MET(T)A Protocol page**
24. **Create For Treatment Centers page**
