YOUR BIGGEST RISK RIGHT NOW

Headings

Search engines can't tell what your pages are actually about, and neither can someone skimming your content — both leave confused.

WHERE YOU SHOULD BE

Sites that rank well typically score **85+ (Good)**. Right now Maxwell Plumbing & Drain is **23 points away** from that threshold — every point below it is a real reason a competitor outranks you in search.

SEO problems compound over time. The longer they go unaddressed, the more search engines discount this site's authority — and the more it costs, later, to win back rankings already lost.

Every week this goes unaddressed, competitors who are already fixing these exact issues pull further ahead.
