WHERE YOU STAND RIGHT NOW

Your recent SEO audit scored joewelchphoto.com **70 out of 100**. 15 of your 39 pages are missing the summary Google shows in search results, and 32 pages have title tags that run too short or too long. More importantly: a separate, unrelated photographer operates a nearly identical website, and nothing currently tells search engines you're not the same business. Your titles also lead with Miami-Dade, when Fort Lauderdale and Broward County are your real priority market. The right plan turns these gaps into rankings — for aerial/drone, commercial, and hotel/resort photography searches in the market you actually want to win.

WHY PARTS OF PRACTICE

Fixes That Actually Move Rankings

Your audit found specific, real issues — a brand collision, missing meta descriptions, mismatched geo-targeting. Every month's work targets the gaps that are actively limiting your visibility.

Built Around Your Real Priorities

You told us aerial, commercial, and hotel/resort work in Fort Lauderdale/Broward matter most. That's what we optimize for — not a generic template.

Clear Communication & Reporting

Monthly reports in plain English. You'll always know what was done, what it means, and what comes next.

Results That Compound Over Time

Schema added in month one still works in month twelve. Every improvement is permanent and cumulative.

Ready to get started?

The SEO Support plan (\$99/mo) is the recommended starting point — it covers everything your audit identified as critical, including the brand-disambiguation schema and Fort Lauderdale/Broward retargeting.
